Becoming pregnant and its pre-requisites	20-22
The Five Pillars of Natural Conception	23
The Outline of Natural Conception	24
The Mechanism of Natural Conception	24
<b>5. The causes of Infertility</b>	<b>25-38</b>
The causes of infertility (Seven colours)	25
Unexplained infertility	25
Male factor infertility	26
Anovulatory infertility and PCOS	27-28
Tubal factor infertility	29-31

Endometriosis	32-34
Sexual dysfunction	34
Cervical mucus hostility	34
Other conditions associated with infertility	35-38
Uterine fibroid	35-37
Asherman's syndrome	38
Cervical stenosis	38
Congenital uterine and vaginal anomalies	38
<b>6. General Pre-pregnancy Advice</b>	<b>39-46</b>
<b>(General advice for couples trying for pregnancy)</b>	
Natural conception	39
Optimum frequency and timing of sexual intercourse	39
Drinking alcohol	39
Smoking	39
Caffeinated beverages	39
Body weight	40
Diet	40
Vitamin A & D	40
Exercise	41
Occupation	41-42
Prescribed, over-the-counter and recreational drug use	42
Folic acid supplementation	43
Susceptibility to Rubella (German measles)	44
Susceptibility to Chicken pox	45
Tight underwear for men	46
Complementary therapy	46
Cervical cancer screening	46
Stress and counselling	46
<b>7. Infertility Counselling</b>	<b>47</b>

<b>8. Consulting Infertility Specialist</b>	<b>48</b>
<b>9. Infertility Investigations</b>	<b>49-56</b>
<b>(Initial investigations)</b>	
<b>Female partner</b>	<b>49-56</b>
BMI, WHR	49-50
Infection screen	50
Blood tests including hormones	50-53
USG (TVS/TAS)	53
Tubal patency tests	54-56
Laparoscopy, HSG	54-56
HyCoSy	56
Fertileoscopy	56
Fallopscopy	56
Hysteroscopy	56
<b>Male partner</b>	<b>56</b>
Semen analysis	56
Post-coital test	56
<b>10. Management of Infertility</b>	<b>57-68</b>
<b>Initial general management</b>	<b>57</b>
<b>Management of specific problems</b>	<b>58-67</b>
<b>I. Sub-optimal frequency of sexual intercourse</b>	<b>58</b>
<b>II. Female sexual dysfunction</b>	<b>58</b>
<b>III. Female partner's BMI &gt;29</b>	<b>58</b>
Exercise and dieting, Orlistat, Bariatric surgery	58
<b>IV. PCOS with BMI &gt;25</b>	<b>59</b>
Exercise and dieting, Metformin,	59
Ovulation induction, Ovarian drilling	
<b>V. Anovulation only: Female partner's BMI <math>\leq</math>29</b>	<b>60-61</b>
Ovulation induction, Clomifene, Gonadotrophins,	60
Ovarian drilling	
Side effects and complications of ovulation induction	61
Ovarian hyperstimulation syndrome, multiple pregnancy,	61
ovarian cancer, miscarriage, ovarian failure, Letrozole	

<b>VI. Tubal problems</b>	62-63
Success rates and comparison of tubal surgery with IVF	62
<b>VII. Unexplained infertility</b>	63
IUI, IVF, Clomifene, Tubal flushing	63
<b>VIII. Endometriosis</b>	64
Laparoscopic surgery, IUI, IVF	64
<b>IX. Abnormal semen quality</b>	65-66
Infection, semen culture, repeat semen analysis	65
Hormones	65
Karyotype and Y-chromosome microdeletions	65
IUI, IVF/ICSI, vasectomy reversal, PESA, testicular biopsy, donor IUI/IVF, MESA, TESA, TEFNA, TESE	65-66
<b>X. Other male problems</b>	66
Impotence, Retrograde ejaculation, Anejaculation, Antisperm antibody	66
<b>Comparison of IUI with IVF</b>	67
<b>Surrogacy</b>	68
<b>Adoption</b>	68
<b>11. Interesting facts about IVF</b>	<b>69</b>
<b>12. Concerns about IVF and ICSI</b>	<b>70-72</b>
Adverse maternal outcomes	71
Adverse perinatal outcomes	71-72
Yq deletions, Cystic fibrosis	72
<b>Key points</b>	<b>73-76</b>
<b>References and further information</b>	<b>77</b>
<b>Introduction about the Author</b>	<b>78</b>
